Trinity College London, 2024

Gabriel Domínguez Torres

Computer Engineer | Full-Stack Developer

Computer Engineer and Full-Stack Developer with hands-on experience building web applications, internal platforms and digital solutions across frontend, backend, databases and deployment workflows. Strong foundation in Linux, containers, cybersecurity and software project management. Currently pursuing postgraduate studies in Software Engineering, AI and DevOps.

PROFESSIONAL EXPERIENCE

· Evolved Ideas Spain — Software Developer Intern

Oct 2025 – May 2026

Worked within a multidisciplinary software team during curricular and extracurricular internships, contributing to the development, enhancement and maintenance of digital solutions while following professional development workflows.

· Calmtag — Full-Stack Developer

Feb 2026 – May 2026

Developed a web platform for generating and managing QR codes, including frontend and backend features, database integration, content administration and general platform maintenance.

· OGI Salud Canarias — Web Designer & WordPress Developer

Apr 2025 – Aug 2025

Redesigned and rebranded the corporate WordPress website, improving UX, responsive behaviour and on-page SEO. Integrated Mailchimp and collaborated with UX, SEO and management teams using Scrum.

· C.D. Maspaoasis — Full-Stack Developer

Dec 2024 – May 2025

Developed a sports management platform covering users, bookings, payments, events, invoicing and competitions, including an admin panel, tournament brackets and real-time result updates.

· Freelance Web Development — Full-Stack Developer

Sep 2023 – Mar 2025

Built and maintained websites for construction and photography businesses, delivering responsive interfaces, catalogues, forms and CMS solutions using PHP, JavaScript, HTML, CSS and MySQL.

SELECTED PROJECTS

· Creadu — Web Platform

Contributed to feature development, issue resolution, performance optimisation and final UX improvements across the platform.

Team Manager — AI-powered Sports Management App

Developed an application to centralise team and sports activity management, incorporating AI-powered functionality to support planning, information analysis and decision-making.
